“The XPRS Series offers clear sound, strong presence, and fantastic value for money.”

Manager | LAUREL TOKYO

When we were choosing a sound system for the opening of the club, an acoustic engineer recommended the XPRS Series, telling me: “The sound was great – I’d never heard anything quite like it before.”. After hearing the XPRS in multiple venues, and listening to the speakers at the Pioneer DJ studio, it was clear they would be perfect for my venue. Their sound is clear and has a strong presence, so we created the whole system – from the main dancefloor to the monitors – with XPRS speakers. It’s been praised by DJs not only for the high-quality sound on the floor, but also for the great monitoring environment. The quality of the XPRS matches the luxury atmosphere of the club and combines with the venue’s unique lighting to create a warm feeling. The sound required by clubs can vary between venues, but because the XPRS Series offers clear sound in all environments, strong presence, and fantastic value for money, I think these speakers should always be considered.
